CCR No. 96-0906/A	**Logged Date** 8/2/96	**Rev.** A	**Request Type** CCR

Priority Routine **X** Urgent ☐ Emergency ☐	**Affected Release**	**Change Class** I I

Title (description)
The RTM Component Class Population of Release B CSS Components.

Documents Affected	**Source Nos** (RID, NCR, Action Item, GSFC CCR, etc.) or **Tech Reference** **Release B CSS for AC-96-0367** **(Do not close Action Item until notified by Originator)**

RTM Change **X** **Start New Baseline** ☐

Problem
Currently, the Release B CSS design components and their links to Level_4 requirements does not exist in the RTM MAIN. The RTM Component Class should be populated with these and other components of the Release B design and the components linked to the corresponding Level_4 requirements of the Level_4 Class of RTM MAIN. This Version (A) of this CCR differ from the original version such that mappings are removed since the Release A components intended to be used by Release B does not exist in the current RTM database (Version073196).

Proposed Solution
Populate the Component Class of RTM with the Release B CSS components. Then link the components to their corresponding Level_4 requirements of the Level_4 Class. This CCR will load only the components developed by Release B. The Release B Level_4 requirements that reside in RTM will be linked to Release A and Release B components via this CCR.
